Ethical Understanding

In Research Project B, students develop their capability for ethical understanding by, for example:

- identifying and discussing ethical concepts and issues

- considering ethical and safe research processes, including respecting the rights and work of others, acknowledging sources, and observing protocols when approaching people and organisations

- appreciating the ethical and legal dimensions of research and information

- reflecting on ethics and honesty in personal experiences and decision-making

- exploring ideas, rights, obligations, and ethical principles

- considering workplace safety principles, practices, and procedures

- developing ethical sustainable practices in the workplace and the community

- inquiring into ethical issues, selecting and justifying an ethical position, and understanding the experiences, motivations, and viewpoints of others

- debating ethical dilemmas and applying ethical principles in a range of situations.
